Report of the Mayor

To the Citizens of the City of Rutland:

I hereby submit, for your consideration, my fourth annual report as Mayor of the City of Rutland for the year ending Dec. 31, 1922.

In co-operation with the members of the City Council, we have tried to carry out the duties of the offices we were elected to for the best interests of the people we represent.

Again this last year, through the efforts of the City Treasurer and the ease in the money market, the bonds for street improvement, Grove St. widening proposition and Church St. School, to the amount of \$107,000.00 were all issued at a rate of $4\frac{1}{2}\%$ in place of 5% . We also received a premium on these bonds of \$3,961.00.

While we have increased, through the vote of the people for city improvements, our bonded indebtedness \$107,000.00, we have saved, through the payments of bonds and sinking fund earnings \$41,007.64, making the net increase in our bonded debt of \$65,992.36 as shown by the following figures taken from the report of the Treasurer. It is made up as follows:

Total bonded debt.....	\$833,000.00
Less sinking fund, water.....	\$93,008.63
Less sinking fund, general.....	317,668.57
	<hr/>
	410,677.20
Net debt of City Dec. 31, 1922.....	<hr/>
Net debt of City Dec. 31, 1921.....	422,322.80
	<hr/>
	356,330.44
Net increase in bond debt.....	<hr/>
	\$65,992.36

The following statement shows how increase was made:

Street improvement bonds 1922 issue.....	\$50,000.00	
Church St. bonds 1922 issue.....	32,000.00	
Grove St. bonds 1922 issue.....	25,000.00	
		<hr/>
General appropriation to sinking fund	\$12,000.00	\$107,000.00
School Bonds Nos. 583-584 paid from general account.....	2,000.00	
Street improvement bonds Nos. 608- 617 paid from general account....	10,000.00	
Sinking fund earnings.....	17,007.64	
		<hr/>
		41,007.64
		<hr/>
		\$65,992.36

We also were able to close our books with a cash balance on hand from our general accounts of \$27,045.54

I know the people of Rutland will be pleased to read the report of our City Treasurer, one that is a credit to any city, and shows that we have, in the different departments, tried to live within our means.

PUBLIC WORKS DEPARTMENT

This Department, under the Supervision of Mr. Joseph P. Feeley, has been taken care of in a most thorough and business-like way and for the best interests of all concerned, and I trust that every tax payer in our city will read very carefully the report as published by him, showing the amount of work done and the cost of same. The system of costs, material, labor, etc. used in the work of this department, and the detailed records that are kept, are a credit to this or any other city, and I would say right here, that, never, since Rutland has been a city, have the records in this office been kept as complete in all details as since Joe Feeley has been on the job.

It has been a pleasure to me, as Mayor, to work with a man like Feeley and feel that the people's money was being spent as it should be and for the best interest of all concerned. I know and feel that the majority of tax payers will agree with me, that work and good work has been accomplished.

Early last spring, I took up with the members of the city council the matter of doing our own permanent work and the purchase of equipment for this purpose, and I am glad to say that everyone, to a man, was in favor of doing this and giving it a trial. I think that every tax payer, after reading the report, will agree with me that it was well worth the money.

In doing our own work, we knew just what was being used on the job. We employed all local men in the work, the sand was bought by the yard from a local pit and delivered on the job, and the cement bought from local merchants. Nearly all of the stone was taken from our pine hill quarry, and, you will be surprised when I tell you, that 10,000 tons of stone was used from this quarry this season and it hasn't made a dent in it. With the improved way of handling the stone at the quarry, through the use of the dumping copple cars and track running from our crusher into the quarry, doing away with the horses and dump carts, we were able to produce this stone delivered on the job for \$2.00 per ton. The price on imported stone, not of as good quality, would cost us \$3.25 to \$3.75 a ton delivered. The tests, which we have made of this stone, show it to be the best of its kind in New England.

We have resurfaced and reshaped a number of streets during the year, but could not get to them all.

We have built two new concrete bridges over Moon Brook, one on South Main St. and one on Killington Ave. These are permanent investments and will last for years to come. We have paved River and State St. bridges with a creosote block and planking sub-base, which will save us a big maintenance cost. All of our steel bridges have been painted. According to the records, this was the first time in about twelve years and this work was badly needed.

We have done quite an amount of sidewalk work, mostly of cement concrete, at a price that people can afford, and at the same time, giving the public a good thing.

We have installed and replaced quite a few sewers the past year, but, on account of the money, were not able to take care of all the new sewers asked for. This city has got to spend, and the time is not far distant, a lot of money on its sewerage system. With numbers of new houses going up each year, more hard surfaced roads being built that require drainage, our sewers haven't the capacity they should have.

We purchased this last spring a compressed air drill sharpener and a portable forge, which we installed at our crushing plant. At this plant, we keep a good blacksmith for sharpening our drills, picks, bars, in fact, does nearly all the blacksmith work for our quarry, street, sewer and water department. This not only saves us a lot of money, but time, by having the work done right on the job. We have worked our crushing plant up to within the last three weeks, uncovering, grading and getting out stone and having it piled up ready for business in the spring.

WORK ACCOMPLISHED UNDER THE BOND ISSUE

In order to do this work ourselves, it was necessary to buy equipment. This, we did and it has been paid for out of this year's account, therefore, will not be an indebtedness in 1923 account. This equipment included a cement mixer, 2 ton auto truck, steel road forms, wheel barrows, etc., costing about \$9,000.

The cement concrete road was started at Center Rutland near the entrance to Evergreen Cemetery, taking in West St., Columbian Ave. and State St. to the intersection of Grove St., from this point to the intersection of Grove and Library Ave. there has been laid a section of North St. from Main St. to Lincoln Ave. This was made possible through the generosity of Mr. O. J. Maigne, who gave his check to the city of Rutland for \$2,000 towards this work. We also laid a section of concrete road from State St. to the yard entrance of the Rutland Ry. Light & Power Co., who paid one-half of the expense of this

work. The type of pavement laid has been what is termed as a 1-2-4 mix having a 7" uniform thickness, all of which is reinforced. As you will notice by the report, we have laid 21,384 sq. yds. at a cost of \$41,429.65. After doing this paving work, paying for the equipment and deducting the credits on this work, we have a balance of \$5,830.29 and have built about 2½ miles of permanent road in comparison with about 1½ miles last season at a cost of about \$43,274.32. I ask you, did it pay to do our own work? We also have a balance of \$748.96 left in our Street Department, and, with the amount of work that has been done, this is a pretty good showing for this department.

WATER DEPARTMENT

This department, under the supervision of Mr. Francis Tracy, has been well taken care of. There have been some new hydrants installed, new mains on several streets, including the extension of 6" mains on Woodstock Ave., and Meadow St. from West St. to Convent Ave., and a number of new services. We were unable to do any reforestation on our water shed as we had expected, on account of not being able to buy any trees. We have placed our order for the coming season and hope we will not be disappointed, as we consider this a valuable asset to the city in the future years.

DEPARTMENT OF PUBLIC SAFETY

I consider this department well looked after by Commissioner Fred C. Roberts. Again I am proud to mention the efficiency of our Fire Department as is shown by the number of alarms (104) with a total fire loss of \$23,328.51. The only criticism that I have to make is, that the Underwriters do not give our department the credit they deserve and the city the rating they are entitled to.

On the resignation of Chief Hyland in the Police Department, I appointed to this position Mr. E. H. Lawson and this department has been well handled under his supervision.

DEPARTMENT OF CHARITIES AND CORRECTIONS

This department is well taken care of under the supervision of Mr. and Mrs. Hickey. With the number of people out of employment this last year, I feel that they have handled the situation well and with as little expenditure as possible, and, at the same time not neglecting those who were in need.

MEMORIAL HALL

The same appropriation of \$4,000.00 was made to the Library the past year and the money appropriated has been well spent by the ladies in charge. With the large circulation, cramped quarters for books as well as for those who patronize the library, it is a disgrace that a city the size of ours hasn't a better equipped and more up to date building for this purpose. The present building never was and never can be made into a library building. Rutland is extremely fortunate in having as Librarian, Miss Cheney.

CONCLUSION

In conclusion, I desire to express my appreciation to the Honorable City Council for their co-operation in conducting the affairs of our city and the friendly relations that have existed.

To the Treasurer of the city, City Clerk, the Heads of the different Departments, as well as to the different foremen and the men connected with them, I extend my gratitude and thanks for all their assistance.

Respectfully submitted,

JAMES C. DUNN,

Mayor.

Report of the City Treasurer

To the Honorable City Council:

Gentlemen:—I herewith present to you my report as City Treasurer for the fiscal year ending December 31, 1922.

RECEIPTS

Taxes received by City Treasurer.....	\$363,061 92

Respectfully submitted,

CHARLES H. LANDON,
CHARLES M. SMITH,
HENRY F. FIELD,
Commissioners of Sinking Fund.

Report of the Commissioner of Public Works

To the Honorable City Council:

Gentlemen:—In accordance with the provisions of the City Charter, I submit, herewith, the annual report of the Commissioner of Public Works, for the year ending December 31, 1922.

ORGANIZATION OF THE PUBLIC WORKS DEPARTMENT

Office Force.
R. H. Royce, Engineer
C. C. Bentley, Clerk

Frank Tracy, Supt. of Water
James McLaughlin, Foreman of Streets and Sewers
Roy Leonard, Foreman at Crusher
John Conner, Foreman of Bond Issue Construction.

The department of Public Works surveyed and supervised the construction of all work completed under the paving bonds issued for 1922.

The paving of West St., Columbian Ave., and State St., Grove Street between State and Library Ave., North St., between Lincoln Boulevard and North Main St., and Cleveland Ave., South from State St. was under way April 17, 1922, and the pavements completed October 12, 1922. This department bought equipment including mixer, truck, steel forms, and miscellaneous tools for \$9,000.00. The type of pavement built was reinforced concrete of 1-2-4 mix and 7" uniform thickness.

Estimate of work as follows: *4800 Tons Stone*

West St. and Columbian Ave.	9600 sq. yds.	\$16,740.95
State St.	6967 sq. yds.	13,401.34
Grove St.	2847 sq. yds.	5,902.06
Cleveland Ave.	400 sq. yds.	982.35
North St.	1570 sq. yds.	4,402.95
	<hr/> 21384 sq. yds.	<hr/> \$41,429.65

The department also completed the bituminous macadam in car track area on Grove and State Streets for the Rutland Railway, Light and Power Co.

Estimated as follows: *410 Tons Stone*

State Street	2600 sq. yds.	\$2,409.33
Grove Street	1125 sq. yds.	1,566.75
	<hr/> 3725 sq. yds.	<hr/> \$3,976.08

The work on North St. was made possible by the generosity of Mr. O. J. Maigne, who paid one half the cost of construction.

State and River Street bridges were paved with wooden creosoted blocks. All iron work on the following bridges received one coat of paint: Crescent St., State St., River St., and Ripley Bridge at Center Rutland.

Two new concrete bridges were built over Moon Brook, one on South Main St. and the other on Killington Avenue. The costs on bridge work may be found under the heading—General Account.

STREETS

A large area of our water-bound macadam and gravel streets were scarified and reshaped. The majority of our hill streets are in good condition, and we did not have any serious washouts during the spring rains.

City Park and Crescent streets were resurfaced with material excavated from State Street, and also Spellman Terrace and Ives Ave.

A patrol man cold-patched and maintained all the water-bound macadam roads and the results were very satisfactory. We still have a large mileage of dirt road that has no drainage and needs to be built with gravel or stone. Then we have considerable mileage of streets that has never been worked.

Oil was applied to the City Streets in May and July, furnished by the Standard Oil Company and applied with power spreader. The cost of oil was considerably cheaper in 1922, and very few complaints were received from the public.

Water sprinkling was done in the business sections by the horse drawn motor flusher.

SEWERS

Considerable sewer work was done this year. Numerous manholes and catch-basins were built. Park Street sewer was cleaned, and two manholes constructed. This sewer is only 6" and should be 12". Maple St. sewer was relaid and manholes constructed. The cause of the trouble in that section was due to small tile and flat grade. The residents on Maple Street have complained for years, but no complaints have been received since completion of the work. The sewer in Lincoln Boulevard section has been plugged a number of times. This sewer drains a large area and at the present time very few residents are connected, and if we experience a building boom in this section, the sewer will have to be relaid with larger tile. This sewer is partly filled with quicksand, due to faulty joints and sags in the grade.

Mussey Brook sewer caused many complaints from residents in the vicinity of Chaplin Ave. and South Main St. Investigation showed small tile, grade pitching the wrong way, and no manholes at intersection of sewer lines. This sewer has been enlarged and manholes built and the nuisance abated.

New sewers were constructed on Dana Avenue, James Street, Norton Place, Temple Street, Woodstock Avenue, West Street, Bellevue Avenue, Allen Street, East Washington Street, and Harrington Avenue.

The trunk sewer on Baxter Street broke on the arch for a distance of 60 feet, and was replaced with tile pipe.

Due to the laying of the concrete pavement on Columbian Avenue, State and Grove Streets, the sewer system was replaced with tile pipe. We found that most of the cement pipe on State Street was in poor condition and would have to be replaced in a few years.

Manholes were constructed, and also catch-basins to replace the old type of basin. These basins had no receiving chambers for street washings and sediment, which caused the sewers to plug. This condition exists throughout Rutland's sewer system.

All catch basins were cleaned in the Spring and Fall.

NEW STREETS

The Board of Street Commissioners accepted, Norton Place, Charles Street, and Grove Street widening.

SIDEWALKS

Sidewalks were constructed by the Street Department, both cement concrete and tar concrete.

Engineering Work

The following sewer and drainage projects were surveyed, mapped and estimated.

Allen Street sewer, Avenues A and C sewer, Bellevue Avenue sewer, Dana Avenue sewer, East Washington Street sewer, Harrington Avenue sewer, James Street sewer, Killington Avenue drainage, Lincoln Boulevard, to and along North Main Street sewer, Maple Street sewer, Norton Place sewer, Park Street sewer, Temple Street sewer, West Street sewer.

Post Street Yard fence was located, graded and estimated. West Street Cemetery fence along West Street was located, graded and estimated.

The tract of land known as Pine Hill Park, containing 277 acres was surveyed and mapped. The necessary preliminary and location surveys for the 1922 Bond Issues for permanent pavement, including profiles, cross-sections, estimates of cost, and quantities, etc., was made and complete plans drawn.

A survey and plan for the widening of Grove Street was made and recorded.

Various city and street lines and grades were given as soon as possible after requests for same were made.

The street oiling this year was under the direct supervision of this office and the cost was materially decreased from last year. The work of arriving at the individual tax payer's bill, must take into consideration the total number of square yards oiled, the total cost of oiling, the unit cost per square yard, the linear feet of frontage, the width oiled, and the number of times oiled. Each tax payer is assessed for one-third the total cost of oiling in front of his or her property.

Survey and plans were made and construction supervised of concrete bridge on South Main Street over Moon Brook. Line and grade were given for concrete bridge on Killington Ave. over Moon Brook.

Preliminary and location surveys were made, including cross-sections and profiles of proposed permanent pavement for 1923 Bond Issue on North Main Street, from North City Limits, southerly to West Street, thence southerly on South Main Street to Strongs Avenue.

A great amount of clerical work in connection with the keeping of cost accounting and distribution to proper accounts, has been done. This system is designed to give the total sum expended at end of each days work, in each department, and requires constant attention and accuracy.

A cost estimate of Municipal Garbage Distribution was made and a cost estimate of a Municipal, Lighting Plant was commenced.

A survey and map of the plant layout of the City crusher was also made.

WIDENING GROVE STREET

The Board of Aldermen requested a survey and costs necessary to widen Grove Street, between West and State Streets, for 15 feet in a westerly direction. A plan was completed and line and grade established, which were submitted to a committee from the Board of Aldermen. The survey was approved and the work of widening, which consisted of raising the old wooden fronts of the building and rebuilding with brick. The work has progressed rapidly, and the pavement and all work should be completed before June, 1923.

GARBAGE REPORT

The removal of garbage and its destruction involves collection, transportation and method of final disposal. In this report I will endeavor to touch on each division so you may have a full understanding regarding the working and cost of the garbage situation in Rutland.

COLLECTION

The term garbage may be classified as follows: vegetable and animal matter, ashes including floor sweepings, broken glass, discarded kitchen ware, tincans, and worn out furniture, and rubbish which means paper, rags, bottles, metals, old clothes, shoes and rubbers.

Collection of garbage affects more people than disposal and requires regulations and ordinances, also sanitary containers and covered trucks and wagons.

Until quite recently the collection service rarely received the consideration from city officials, which its importance deserved on account of both cost and sanitary efficiency.

An efficient and faithful collection service is advisable for the City of Rutland, if we are to have a municipal garbage plant. To attain this end a sufficient appropriation is necessary, and efficient organization, also sanitary and economical methods of work and co-operation on the part of the public.

In Rutland garbage collection during the winter should be regulated as follows: Business sections 5 times a week, other sections once a week. Collections in the summer; Business sections 6 times a week, all other sections twice a week.

The collection of garbage must be free from odor or dust, many styles of wagons are in use and the capacities range from 1.5 to 6 cubic yards, the wagons are mostly canvas covered. The collection wagons should be washed and a deodorizer used. It should be required that all garbage be covered and all refuse from the kitchen be drained and wrapped in old newspapers, using this system you eliminate the separate wagons; also that ashes and rubbish be placed in proper receptacles, to be designated by the City Ordinance.

Cost of collection will vary in different communities and the principal items are loading and transportation. Combined collection is cheaper because but one type of wagon is used and the same territories require but one trip. Costs of collections of different cities show the variety of costs.

Albany, N. Y.	\$1.84 per ton
Richmond Borough, N. Y.	1.64 per ton
Boston, Mass.	1.44 per ton
Buffalo, N. Y.	2.19 per ton

Estimated cost of collection of garbage in Rutland would be:

Wagons hauled by tractor.....	\$20.00 per day
2 men loading at \$4.00.....	8.00 per day

Total.....\$28.00 per day

Estimated amount of garbage daily would be 2 pounds per capita or 16 tons at a unit cost of \$1.75 per ton.

Estimated amount yearly at \$1.75 per ton would be \$10,220. This amount could be reduced considerably by charging each dwelling and store a certain price for each container and have the capacities of the containers regulated by City Ordinances.

In Rutland mixed garbage will average 600 pounds per cubic yard or one ton will equal 3.33 cubic yards.

FINAL DISPOSAL

The term "refuse disposal" includes final disposition, utilization or destruction of the refuse material after the collection and delivery. Numerous methods are in use, but I will only consider the methods advisable for the City of Rutland.

The disposal of garbage to be satisfactory to the community must be sanitary and not cause a nuisance or danger to the health and must be economical, that is, the cost must be the lowest that will affect the final disposition; also that disposal be computed, so that plant and equipment may last throughout a considerable number of years.

Your disposal grounds should be definite and police regulations enforced so that no garbage is dumped or placed in sections other than that designated by the proper City authority.

At the garbage plant or works, the materials must be treated, so as to control the organic decomposition, to prevent objectionable odors and maintain the plant in a pleasing and sanitary condition.

DUMPING ON LAND

This method of dumping garbage, is followed more than any other, especially in large quantities, without mixing with other materials. This creates offensive odors, putrefaction and fly breeding which will soon prove a serious nuisance. When garbage is mixed with a sufficient quantity of ashes, rubbish or street sweepings, the dumping is less objectionable. To remove all odors, if this method is used, the garbage must be covered with a thin layer of excavated soil and policed at all times. The dump

should be enclosed by a light board fence to keep papers from blowing on the street and hide the dumps from public view. Scavenging should be strictly forbidden. More garbage is disposed of by dumping than any other method. This is our present way of disposal in Rutland.

Average amount of garbage received per day at dump, 3 tons

Cost of maintenance of dumps, \$2.25 per day

Cost per ton of garbage, \$.75 ton

FEEDING GARBAGE TO HOGS

Garbage may finally be disposed of by feeding to hogs in a municipal hogger, to do this will increase the cost of collection, as the garbage will have to be selected. Garbage is given to hogs in its raw state or is first cooked and warmed or mixed with stock food of some type. Farmers in small communities collect garbage and feed it to their stock, this type of collection is carried out in Rutland and costs the City nothing. Providence, Rhode Island; Pawtucket, Rhode Island; and Worcester, Mass. and many other cities feed their garbage to hogs.

In 1904 investigation by the State Board of Health in Massachusetts revealed the fact that 61 cities and towns were disposing of garbage in this way.

The chief requirements in feeding garbage to hogs are to keep the garbage as fresh as possible, so as to preserve the highest food value and to have the proper medical attendance to safeguard the health of the hogs. Hogs are subject to cholera, pneumonia, foot and mouth disease, and in a municipal piggery should be treated for these diseases, otherwise the pork will be infected and a large percentage of the hogs will be lost through death. To maintain a piggery it is necessary to have a sanitary and properly heated and ventilated building. This requires considerable investment and upkeep. It also requires the initial expense in the purchase of the hogs.

The estimated cost of a piggery for the City of Rutland exclusive of land.

400 hogs at \$20.00.....	\$8,000.00
Water and sewer.....	2,000.00
Building fence and yard at \$1.00 per foot.....	2,140.00
Yard to be 120 ft. x 450 ft. shelter house 40 x 70....	4,000.00
	<hr/>
Hauling garbage from City 5 tons at \$1.75.....	\$16,140.00
Foreman.....	8.75 per day
2 laborers at \$4.00.....	6.00 per day
Medical attention and medicine.....	8.00 per day
Miscellaneous items.....	3.00 per day
	2.00 per day
	<hr/>
or \$5.50 per ton.	\$27.75

The piggery will only take care of about one third of our garbage that is about 11 ton of mixed garbage will have to be disposed of elsewhere. Feeding garbage to hogs also requires that the public keep their garbage in separate containers and have more frequent collections.

INCINERATION OF GARBAGE

The disposal of garbage by incineration or burning is practiced throughout the United States in several ways. Each community has its own problem and method of burning.

To properly destroy garbage by burning requires a special type and design of furnace. In Rutland we would require a plant equipped to burn 20 tons of mixed garbage in 24 hours. To properly destroy garbage the furnace must attain a temperature of at least 1200 degrees Fahrenheit.

Incinerator plants may be built in the city proper without reducing the real estate value in the locality, the cost and equipment of a proper building is a large item for a small city or town

The following is an estimate cost of an incinerator for Rutland to dispose of 20 tons of mixed garbage.

Building and equipment.....	\$8,000.00
Collection of garbage, 16 tons at \$1.75.....	28.00 per day

Disposal at incinerator	
one foreman at \$6.00 per day.....	\$6.00
Fuel .50 per day.....	.50
Lights .10 day.....	.10
Miscellaneous supplies per day.....	.90

The total cost of disposal would be \$.97 per ton, this plus costs of collection would be \$2.72 per ton.

If the City of Rutland deems it necessary to use any of the methods described, a full report would be advisable with working drawings, cost of equipment and total estimated cost of disposal.

At the present time Rutland disposes of 3 tons of mixed garbage a day at the River Street dump, by the dumping on land method. All the garbage does not come to the dumps as upon investigation it is found that it is dumped in all outlying sections. Our clean-up week in the Spring is a big asset to the cleanliness of the City.

Numerous private collectors remove sorted garbage to feed to hogs; also private homes burn their kitchen refuse in the furnace or stove.

Cost of garbage disposal in Rutland at present is \$.75 per ton and we handle 8 tons per day. If the present dumps had a tight board fence on the North line of River Street, and a deodorizer used this would be the cheapest and most economical way of disposal in Rutland for a number of years.

POST STREET YARD

The City yard has been partly graded and materials stocked in piles according to size and class. All our equipment was overhauled, painted and placed under cover during the Winter season. Materials, such as brick, tile pipe, water pipe, lumber and coal

are bought in large lots and stored at the yard, without danger of having them broken or stolen, due to the protection from the woven wire fence.

PINE HILL QUARRY

A large amount of stone was quarried this season at our quarry on Pine Hill, and was used by the Bond, Street, Sewer, and Water Departments. The crusher had to receive a general overhauling. New motors were installed. The air compressor is in poor condition and will have to be replaced after next season. The capacity of air now will run only one small drill, and as the quarry develops, it will require at least three drills with greater cutting power.

The plant is operated by electric power and the material is brought to the crusher by Kopple cars. An automatic drill sharpener and black smith forge are part of the equipment.

The following report was secured on the quality of the stone at Pine Hill Quarry, from testing Laboratory of the State of New Hampshire.

Laboratory No. 2415.

Name of stone, Cambrian Quartzite.

Examined for—percentage of wear, grading, geology, etc.

French coefficient—11.5%.

Wear—1.7%

Kind of stone—Pure white quartzite, extremely solid.

Remarks: The most resistance to abrasion of any rock tested in the New Hampshire State Laboratory. The next more resistant rock being traps from Greenfield, Mass. 1.9% wear; Winchester, Mass. 3% wear; and Peabody, Mass., 3.3% wear.

WATER DEPARTMENT

The Water Department had several items of expense in addition to the necessary upkeep. The first was caused by the breaking of the main at the intersection of Merchants Row and West Street, the necessary cutting of the cement pavement, making repairs, refilling, etc.

The new cement pavement from Center Rutland to Grove Street was another item. All services, where necessary were relaid; new services put in for vacant lots; and all valves inspected and repaired, when repairs were found necessary.

A new 6" main, replacing a small, older main from Baxter Street east to a point near 121 State Street, including intersections at Pine Street and State Street; Noyes Ave. and State Street; Cleveland Ave. and State Street; and Water Street, a total of 1,060 feet. A new hydrant was placed at the corner of Noyes Ave. and State Street. All services where the main was laid were transferred from the old main to the new one; and those found in poor condition were replaced by new ones. Lead pipe was used in relaying all services that extended under the Street Railway track.

All services on Grove Street, between State Street and Library Avenue were relaid new, and all valves repaired where found necessary.

All services on North Street, from the intersection of Lincoln Ave. and North Street, to the intersection of North Street and North Main Street were relaid and New services put in for vacant lots.

A new 6" main was laid on Park Avenue, from Cleveland Avenue easterly 165 feet; a 6" main extension on Woodstock Avenue, 300 feet in length; a 3" main extension on Williams Street, 74 feet; a 6" main on Watkins Avenue, 15 feet; a 6" extension on Ives Avenue, 68 feet; a 6" on Dana Ave. 132 feet; a new main, 6" on Norton Place, 250 feet; a 6" main on Charles Street, 245 feet; a new 6" main on East Washington Street, 250 feet; and a new 6" main on Meadow Street, 1,675 feet. Necessary valves were set at the intersection of all streets where these mains were laid.

New hydrants were placed at the corner of Meadow and School Streets, Temple Street and Highland Avenue, Ives Place, Allen Street and Maloney Avenue.

79 new services were laid and 69 old services were relaid. All services on Meadow Street, from West Street to Convent Avenue were transferred from the old main to the new 6" main.

A considerable amount of work was done at the Reservoir, such as cleaning up, cutting brush, breaking ice at intake etc. All streams in Mendon supplying water for City purposes were patrolled. Any work found lacking was done.

A portion of Post Street yard was graded, and all water supplies, such as pipe, fittings, valves, etc. are now arranged in regular order, so that they can be readily reached for use at any season of the year.

All other necessary work, such as repairing valves, hydrants, curb-boxes and meters, which forms quite a portion of the duties of this department has been taken care of as promptly as possible.

The field test at the City Reservoir by the use of Ortho-Tolidine, has been continued throughout the year, and found very satisfactory, in connection with the samples sent by the District Health Officer to the State Laboratory of Hygiene for analysis; for all of which a record is kept on file in the City Clerk's Office. These records can be examined by anyone, so that they may advise themselves that the City water supply is pure water.

REMARKS

Location for permanent pavement work for 1923 has not been definitely decided. North and South Main Streets are under consideration. Merchants Row should have a complete water and sewer system before any permanent pavement is laid. If enough funds are available to construct sewers in this section during the season of 1923, and allow the excavations to settle through the following winter, a concrete pavement could be constructed in 1924. Due to the amount of sewer and water construction work done on West and Wales Streets, in 1920 and 1921, no funds are available for this work without a special appropriation from the Board of Aldermen.

I would recommend that two more concrete bridges be constructed during 1923, and that the ramp on River Street Bridge be paved with hillside wooden block. It would also be good policy to pave Ripley Bridge with wooden block and creosote the deck. This type of construction will overcome the large maintenance cost now necessary to make the bridge deck safe and passable.

Main members over track on River Street viaduct will require attention in a few years.

The Mayor and Board of Aldermen are aware of the conditions of our Sewer system, and now is the time to plan and devise a system suitable for Rutland. Nothing is harder to bring before the public, than the question of sewers—out of sight out of mind. We have now reached the critical point, and ways and means should be devised to protect our city from the nuisance and filth caused by an inadequate system.

A survey and report of conditions, and a complete plan showing location, sizes and grades for every section and street, in Rutland should be made. This plan should be on file in the City Engineer's Office, and new developments should be strictly adhered to. In this way we could save the excessive cost of building sewers on streets without any knowledge of size, rate of flow and grade.

The trunk line sewer and numerous laterals have their flow and operating capacities reduced by the obstruction of roots and street washings which have accumulated for a number of years. If these sewers were cleaned by the turbine or other method, they would give full capacity flow and reduce the nuisance in their respective sections.

A word may be said regarding the attitude of the public towards the Public Works Department, in the construction of the Bond Issue pavements.

We wish to thank the general public for the patience in which they have waited until the pavements were open for traffic, and while it may seem as if unduly strict regulations prevailed, it is absolutely necessary to protect the pavement for at least 14 days after pouring the cement. This not only gives a better pavement, but insures its stability and permanence for a longer period of years. Driving on a pavement before it is properly cured may detract from its compressive strength, and our aim is to build the best type of pavement for a minimum expense.

In closing this report, I wish to express my thanks to the heads of the different departments for their honest and efficient service; to the Honorable Board of Aldermen, for their cooperation; and to His Honor, Mayor Dunn, for his advice and suggestions, in the many problems that were brought to his attention by this department.

Respectfully submitted,

JOSEPH P. FEELEY,

Commissioner of Public Works.

Report of the Commissioner of Public Safety

To the Honorable City Council :

I hereby submit my report, as Commissioner of Public Safety, of the Fire and Police Departments for the year 1922.

The Fire Department is composed of the Chief Engineer, 1st. Asst. Engineer, 2nd. Asst. Engineer, eight regular firemen, thirteen call men and one steamer engineer.

The Chief Engineer, 1st. Asst. Engineer and five firemen are located at Station No. 1, and three firemen, one call man and the 2nd. Asst. Engineer are at Station 2.

The department was called out 104 times during the year, 72 telephone, 26 bell, 3 thermostat, and three still alarms.

The number of fires greatly exceeded any year in the history of the department, and the total fire loss was \$23,328.51.

Two factors contributed to bring about this remarkably low fire loss for a city of this size, the first being the efficiency of the department, and the other the constant effort on the part of the citizens, especially in the business section in co-operating with Fire Marshal Reedy in preventing fires by eliminating every possible fire hazard.

That this is a paying proposition is evidenced by the fact that we had only two small fires in the business section during 1922, and if we are able to maintain the record of the past two or three years, our city will be entitled to a much lower insurance rate.

The addition to the department of a car for the use of the Chief Engineer has demonstrated its value several times during the few months it has been in use and is a financial saving to the department.

Station No. 2 received some needed repairs during the year and two new fire alarm boxes were added to the system.

Alarms.....
 Bell.....26
 Tel.....72
 Thermostat.....3
 Still.....3
 Total.....104

Value of buildings.....\$400,925 00
 Value of contents.....325,000 00
 Total value buildings and contents.....725,925 00
 Total damage buildings and contents.....26,631 18

Insurance carried on buildings.....166,880 00
 Insurance carried on contents.....346,173 44
 Total insurance carried on buildings and contents.....513,053 44
 Total insurance paid on buildings and contents.....23,631 18

The department is in good condition at the present time, but the truck at Station No. 2 has been in use nearly eight years and will soon need to be exchanged for a new one, and would recommend that the matter of trading this car for one equipped with a pump be given consideration.

An inventory of the property and supplies on hand shows a total of \$38,117.95.

The expense of the department for 1922 is as follows:

Pay Roll.....	\$16,128.49
Fuel.....	661.59
Repairs and Supplies.....	244.29
Laundry.....	62.30
Telephone.....	19.75
Light & Power.....	190.05
Auto. Supplies and Repairs.....	251.73
Insurance.....	100.00
Ground Rent Station No. 2.....	72.00
New Equipment.....	1,664.98
Sundries.....	18.05
Commissioner's Salary.....	100.00
	<hr/>
	\$19,513.23

The Police Department consists of the Chief of Police, seven regular patrolmen, two specials doing regular duty and a number of special officers.

There were 260 arrests made during the year, 121 for intoxication, 47 for violation of auto and traffic regulations, and 92 for all other offenses. Two hundred ninety four people were given lodging.

The automobile traffic which is constantly growing is taxing this department to the limit, and at least one additional traffic officer will be necessary for the summer months, and I again recommend the purchase of a motor cycle to assist in enforcing the regulations in regard to speeding.

The new Gamewell Police Signal System which has been authorized by the City Council to be installed soon will materially assist this department in their work.

An inventory of property and supplies on hand shows a total of \$870.50.

The expense of the year is as follows:

Pay Roll.....	\$13,548.68
Signal Service.....	542.90
New Equipment and Supplies.....	427.16
Commissioner's Salary.....	100.00
	<hr/>
	\$14,618.74

Respectfully submitted,

FRED C. ROBERTS,
Commissioner Public Safety.

Report of the City Attorney

To the Honorable City Council:

I herewith submit my report as City Attorney for the year ending December 31st, 1922.

During the month of January the taking of testimony in the gas rate investigation before the Public Service Commission was completed. The City's brief was prepared without waiting for the transcript of the evidence and submitted to the Commission about the middle of March, since which time every effort has been made on our part to obtain an early decision in the matter. About the time the City's brief was filed a substantial reduction in the gas rate was made by the Rutland Railway, Light & Power Company, which will result in a saving to the citizens of Rutland of from \$10,000 to \$12,000 per year. This reduction, we believe, resulted from the showing made by the City in this investigation.

The transcript of the evidence was completed in July and the brief of the Rutland Railway, Light & Power Company submitted to the Commission in November. We were recently informed by the Commission that a decision would be made by February 1st, but this date has passed without a decision being rendered. However, it is to be expected a decision will be made within the next week or ten days.

We have been greatly embarrassed by the long delay in these proceedings, but it has been due to the inadequacy of our present law and conditions over which we had no control. There is now a bill before the legislature which, if passed, will give proper protection to the public during the pendency of such proceedings.

Throughout the case the City Attorney has had the valuable assistance of Attorney Walter S. Fenton, to whom much credit is due for the manner in which the petitioner's case was presented before the Commission.

During the year the City Attorney has devoted a great deal of time in assisting the Committee appointed to carry out the widening of Grove Street. In order for the City to acquire some of the property rights required to widen this street it was necessary to bring condemnation proceedings before the Board of Highway Commissioners. Hearing was held before the Commissioners in April and their report, by which these rights were acquired, was filed on June 12th.

During the summer months the Chief of Police and the City Attorney visited the various stores where food was offered for sale and endeavored to enforce the City ordinances requiring that food stuffs be protected from flies and dirt. In only one case was a prosecution brought for a violation of these ordinances.

Pursuant to a vote of your Honorable Council the City Attorney drafted and submitted to the legislature a bill amending the City Charter so as to give the City power to operate municipal light and gas plants and one hearing has already been held on this bill. The City Attorney, acting in conjunction with the City Clerk, has also prepared and submitted to the legislature another bill amending certain provisions of the City Charter which have been superseded by the State Law, and these amendments aim to eliminate any inconsistency between the Charter and the General Laws of the State of Vermont. Among the most important of these amendments is the amendment in respect to the making up of our Grand List. Under the City Charter the time within which the Board of Assessors were required to do certain things in connection with their duties was a great deal shorter than allowed by the State Law, and this inconsistency caused them a great deal of embarrassment.

During the year several insane paupers have been committed to the Brattleboro Retreat for treatment through the effort of the Overseer of the Poor and the City Attorney, and the City thereby relieved from liability for their support and care.

Throughout the year the City Attorney has been frequently called upon to advise and assist various Committees and officers of the City, and it has always been a pleasure and a privilege to render such assistance as was in his power.

Respectfully submitted,

CLAYTON H. KINNEY,
City Attorney.

Report of Overseer of Poor

To the Honorable City Council :-

In accordance with the requirements of the City Charter, I respectfully submit my report as Overseer of the Poor for the year ending Dec. 31, 1922.

Additions to sheds.....	2
Take down sheds.....	2

CHARLES G. NOYES,
Inspector of Buildings.

Report of the Health Officer

To the Honorable City Council:

Gentlemen:—The Health Officer herewith submits the annual report of health conditions of the City of Rutland, Vermont, and the work of the Health Officer for the year 1922.

Communicable diseases reported:

Chicken-pox	40
Diphtheria	3
Erysipelas	2
German Measles	1
Infantile Paralysis	2
Influenza	2
Measles	7
Mumps	3
Pneumonia	8
Scarlet Fever	13
Whooping-cough	30

In addition to the details of routine work of sending releases to quarantined families, quarantining families, reporting communicable diseases direct to the Health Officer, weekly reports of communicable diseases to the Secretary of the State Board of Health and a report of communicable diseases and deaths in the city to the U. S. Public Health Service the Health Officer has made nine visits in consultation with physicians of the city on diseases communicable or suspected to be such. Some of these cases were where a disease requiring full quarantine was so mild that the physician thought best to convince the family of its serious possibilities by calling in one with legal authority; in some cases he was called in to arrange matters of quarantine of other members of the family not ill with the disease; in some cases it was as a matter of self-protection for the physician himself where the disease was not communicable

but where the neighbors might think the physician was hiding a disease which should be quarantined.

Seven families were visited where there was a suspicion of communicable disease but the patient was not ill enough to call a physician. Seven visits were made to look after disinfection after communicable disease or investigate reported violations of quarantine.

During the year 32 visits were made on complaint of nuisances. Some of these were not public nuisances, some nuisances were abated by the legal written notice, some were abated after turning the matter over to the City Attorney but without legal process in the courts. Many of the nuisances complained of were of such a nature that the matter had to be taken up with the City or State's Attorney before action could be taken or the case dismissed. All of the prosecuting officers have been very courteous and conscientious in aiding me in this work and have freely spent their time giving legal advice and looking up the law. I appreciate their help.

Inspection has been made of twenty-four public buildings and plumbing. Since diphtheria and other communicable diseases are no longer considered to be due to sewer gas, the need for inspection by the board of health of plumbing placed in private buildings seems past. It would seem that all joints should be tight and all pipe sound and without flaws for even if there is no pressure ordinarily, a pipe might become stopped and the joints be subjected to pressure. In these cases if not endangering health there might be much loss to plastering, paper and perhaps carpets and furniture. On inspection I have found two jobs where defective pipe had to be replaced and usually there is a joint or two which leaks when I inspect, though the job is supposed to be right before inspection. However, this would now seem to be a matter between the man paying for the work and those he employs. The character of the workmen should be a guarantee of the work done. If he needs watching he should be watched by the employer rather than by the state or city officials. However, if watching is

necessary the Inspector of Buildings should either have supervision in the matter or notify the inspector that the permit for building has been granted, the specifications as to plumbing, etc., otherwise some jobs will be put in without the knowledge of the inspector, as I am confident has been done in some cases the past year. If inspection is needed, all should be inspected and there should be a sure way of checking up.

Thirty-one milk dealers were inspected during the past year. I believe the farmers are trying to equip their barns and premises with sanitary appliances. Many are handicapped by lack of means but are trying by extra care in methods to overcome lack of equipment. Some herds have been tuberculin tested. This should be done but neither dealers nor consumers should be deceived into thinking that tuberculin-tested cows insure safe milk. There are many other diseases conveyed by milk more dangerous to the public than bovine tuberculosis and the tuberculin test only eliminates the latter. A mild type of scarlet fever is prevalent. I have seen several cases with no eruption. If one of these cases should occur without other typical cases no one could make a diagnosis. Such a case in a milk handler might precipitate a serious epidemic. The farmers of Quincy, Ill., have a pasteurizing plant in which 85% of the milk of the city is pasteurized, an ideal method to my mind. Until pasteurized milk is on the market for Rutland citizens all milk fed to small children should be pasteurized in the home.

The water supply continues in good condition. I have sent daily samples to the State Laboratory for bacterial examination. The Water Commissioner keeps careful watch over the watershed, the Chemist or Engineer from the State Laboratory with myself and the Water Commissioner, have inspected the sterilizing plant twice this year. With the Commissioner I visited a farm and eliminated a possible source of sewage being conducted into the stream.

Inspecting, I found a dwelling near the stream furnishing water for the ice consumed by the city, which was a menace. After several conferences with the parties living near the stream

and the owners of the ice plant the danger was eliminated. Another source of pollution was found earlier in the year and removed. This water should be guarded by the ice company and health officials as carefully as the water supply. The ice company is doing its best to furnish pure ice but they must have the help of the health department.

The Camp for Tourists by the Chamber of Commerce has been inspected and recommendations for improvements in toilet facilities made and carried out. By its nature this camp needs special sanitary care, else it is a menace to campers and citizens. The toilets should be frequently cleaned, screening watched and all access of flies prevented. Unless this is done a typhoid carrier camping there might infect tourists or inhabitants and give the city a bad reputation in addition to the sickness itself. If frequent cleaning cannot be carried out a chemical closet might be considered. For comfort of tourists and safety the sanitary condition of the camp cannot be overlooked.

During the past year the President of the Board of Health of the City has passed to his reward. Though he was frankly opposed to the present health system he worked faithfully for the good of the city. He co-operated in every way with the present health officer. In times of stress like the influenza and small-pox outbreaks his judgment, advice and services were invaluable. In the death of Chas. A. Gale the health officer has lost a wise advisor, the city a valuable man and loyal citizen.

In conclusion I believe the City of Rutland from the standpoint of public health is in good condition, but this is not due to the work of any of the officials singly but to the united co-operation of the people.

Respectfully submitted,

BERN D. COLBY, M.D., H. O. Dist. No. 7.

Department of Public Health

Statistics for 1922 compiled from certificates filed in the City Clerk's office.

Treasurer.

I have examined the above accounts and find them correct as stated.

CORNELIA C. PERKINS,
Auditor.

Report of the Board of School Commissioners

To the Mayor, City Council and Citizens of the City of Rutland:

Herewith is submitted the report of the Board of School Commissioners for the year ending December 31st, 1922.

The problem confronting the Board of School Commissioners in maintaining the schools of the city at the highest possible standard of excellence, such as the people of Rutland are entitled to demand and receive, is annually becoming more difficult. Our school population is growing steadily larger, and our necessary requirements are consequently becoming greater and more extended each year. To meet these conditions and requirements necessitates the most rigid economies consistent with the proper and efficient administration of our trust, nevertheless, so far as it has been and is within our power, we have undertaken to perform our duties in such a manner as to insure the greatest good to the greatest number, at the lowest possible expenditure of money consistent therewith.

We have been exceptionally fortunate in having the valuable co-operation and assistance of a superintendent, far above the average in learning and executive ability, and a loyal, most excellent and thoroughly trained staff of teachers. We believe that educationally, our schools have made remarkable progress in the past two years, and with the continued hearty and united support of our citizens, we shall continue to go forward year by year until the Rutland schools will be universally recognized as second to none.

Our problem may be classified under two general heads. I—Finances. II—Lack of an adequate school plant.

I FINANCES

Following is a comparative table showing the receipts and disbursements for the year 1921 and the year 1922.

RECEIPTS

	1921	1922	Increase or Decrease
Balance on hand Jan. 1	\$43 31	2,103 97	2,060 66
City appropriation .85 tax	103,926 95	103,961 48	34 53

	\$111,866 75	\$117,125 27	\$5,258 52
Balance unexpended	\$2,103 97	\$74 07	*\$2,029 90

*Indicates Decrease.

**Includes \$1,123.37 for extra work on Longfellow Building.

Attention is called to the fact that while our receipts, deducting the cash balance carried forward, increased only \$1,167.96 (more than half of which came from state rebates, and only \$34.53 from tax levy) our expenses increased \$5,258.52, all of which is accounted for in the salary account.

It will be noted that except for salaries and a small increase in supplies, we were able to cut down our expenditures substantially.

As to the item of fuel, however, the figures above given are apt to be misleading, because heretofore we have followed the policy of getting coal to the extent of our storage capacity, in the early summer, and have usually carried over quite a substantial quantity into the new year. Today it is a question of being able to get a sufficient supply to keep our schools in operation. Early in the summer, in common with many other large consumers of coal, we went into the market for our winter's supply. Likewise, in common with practically all other large consumers, we were advised by those who claimed to be in a position to know whereof they spoke, to hold off on purchase of coal, as by so doing we would be able to get all the coal we desired at a much more favorable price than was then current.

The result is too familiar to every householder in the city to require more extended comment. Suffice it to say that we have gone into the market and bought soft coal from whomever and wherever we could obtain it, at varying prices, and so far we have managed to keep the schools going. We hope that we may continue to do so, although the future supply is most uncertain and the possibilities not at all pleasing to contemplate.

SALARIES

Some years since, after thorough investigation and report by a special committee, a graduated salary schedule was adopted in the grades, providing for a stated increase annually in the salaries of our teachers, with a maximum of \$1,200.00

and a minimum for teachers entering our school system of \$650.00, thereby removing inequalities so far as possible and making suitable recognition of consistent service. Last year we were compelled to raise this minimum to \$850.00 in order to meet the competition of the surrounding towns and secure the highest class of teachers. The increase in the minimum did not materially affect our salary account as but two or three of our teachers were receiving less than that sum. The normal annual increase under the schedule, however, together with necessary and appropriate increases in the high school, and the additional teachers necessary to care for our increasing school population amount to a substantial sum, and must be provided for. We cannot expect to retain or engage good teachers unless we pay them fair compensation, at least commensurate with what other communities in our vicinity are paying, and we have every confidence that our citizens will unhesitatingly approve our position in this regard.

In order to meet the anticipated increased membership of the schools next September, we shall have to add at least two more teachers in the grades and with the conditions under which the high school is compelled to operate, we shall require the services of at least two more teachers there.

The best estimate which we are able to make at the beginning of the year as to receipts and expenditures for the coming year indicates that with the 85 cent tax, our receipts will be about \$115,500.00 while our disbursements will slightly exceed \$132,500.00. The estimated disbursements exceed the actual disbursements of last year by about \$15,300.00. This increase is represented almost wholly by increased salaries, including additional teachers, of nearly \$11,000.00 which will have to be provided if we maintain our teaching force, and about \$4,000.00 in estimated expense of fuel. We cannot foretell what the coal market will be during the coming year, but it would be a very poor business policy not to provide for whatever contingency may arise, and your board does not feel safe in anticipating that our requirements can be supplied

for less than the budget. We shall consider ourselves fortunate if our expenditures do not exceed the estimate.

It will be seen that we cannot hope to go through the year unless some means are found to increase our revenue. The only method of increasing our receipts is by an additional tax. To meet these absolutely necessary expenditures and keep the schools in operation for the coming year will require an additional tax of fifteen cents on the dollar of the grand list, over and above the amount which the city council is authorized to appropriate without an express vote of the people, and we purpose having such an article, giving the council authority to appropriate this additional amount, inserted in the warning for the annual city election.

We trust that we shall have the united support of every citizen of Rutland in this effort to maintain the efficiency and standing of our schools. Never was there a time in the history of this country when the maintenance of our schools was of more importance to the preservation of the ideals upon which our government was founded, than today.

It is the intensive Americanism which only the public schools of this country can produce and foster that has made this nation great and that can carry us by the period of unrest through which the country is now passing. The salvation of our experiment in government depends, more than upon any other one thing, upon the public school, and we must cheerfully and willingly meet whatever expense may be necessary to properly continue this most important work.

That a one dollar tax for school purposes is far below the average appears from reference to the rate prevailing throughout the state.

An analysis of the report of the commissioner of taxes for 1922, shows that of 245 cities and towns in Vermont, eight towns have a school tax of more than \$2.00, Townshend having a tax of \$3.00 and Northfield of \$2.30.

Exclusive of the above mentioned, nineteen towns have a school tax between \$1.75 and \$2.00. Thirty-six towns have

a school tax between \$1.50 and \$1.75. Sixty-one towns have a school tax between \$1.25 and \$1.50. Sixty-nine towns have a school tax between \$1.00 and \$1.25. Twenty-four towns, including the City of Rutland, have a school tax between 85 cents and \$1.00, and only twenty-eight towns of the 245 have a school tax less than 85 cents. The towns in this last group, except for the city of Burlington, are fairly represented by Hubbardton, Mendon, Peru, Searsburg, Somerset, Weybridge and Woodford.

While the school tax of the city of Burlington is only 80 cents, the grand list of Burlington so far exceeds the grand list of Rutland that with that tax the city of Burlington raises substantially \$80,000 more money for its schools than does the city of Rutland. It will be noted from the foregoing that the vast majority of towns in Vermont are paying a school tax running from \$1.00 to \$1.75, so that the request of the Board for the increase of fifteen cents must appeal to every fair minded person as being not only reasonable but very low in comparison with what other towns are paying.

The primary question as it seems to us is not so much what amount of money is expended for school purposes, but whether the money is wisely and judiciously expended so that we get an adequate return in the way of benefit to warrant the expenditures made. To answer this question satisfactorily necessitates the inquiry—Does the pupil have the advantage of competent trained teaching by a staff of fairly paid and therefore satisfied teachers, under proper and efficient supervision, in groups of such size and in an environment that furnishes the pupil every incentive to get the most out of an education that can be obtained? As to the first two inquiries suggested, the Board unhesitatingly states that its staff of teachers conscientiously devoting their best efforts to the education of our pupils, under the competent and able supervision of our present superintendent is sufficient answer. The remaining subject of inquiry will be discussed under the second heading of this report.

TUITION

The question of tuition for non-resident pupils is one which is involved in both sections of this report because it has not only the financial aspect but has some relation to the present inadequacy of our school plant. During the school year ending June 30, 1922, we accommodated one hundred twelve non-resident pupils, distributed as follows:

High School	91
Grades 7 and 8	8
Grades 1 to 6	13

The rate charged for this tuition as determined by the Board of School Commissioners some years ago was as follows:

High School	\$60.00 per year
Grades 7 and 8	30.00 per year
Grades 1 to 6	24.00 per year

The financial statement for the natural school year ending June 30, 1922, which will be found as an appendix to the school reports, discloses that the average cost per pupil based on membership in the high school amounted to \$83.21 for the year, while the average cost per grade pupil based on membership amounted to \$47.10. Regardless of the fact that our school plant was taxed beyond its capacity by our own local pupils, the Board was unanimous in the feeling that we should not be asked to educate pupils from other towns for less money than we were paying to give that education.

We are glad to have these pupils in our schools. We feel that their presence is a most important link in our relationship with surrounding towns, and one which we want to preserve for the benefit of our own city as well as the benefit of the youth of our county, but we believe that our position with regard to the amount of tuition to be charged is so just and equitable that no one can successfully attack or deny its righteousness. The Board, therefore, adopted a new schedule this year, to go into effect at the opening of the school year in September, 1923, based upon the following charges:

High School	\$85.00 per year
Grades 7 and 8	50.00 per year
Grades 1 to 6	45.00 per year

Inasmuch as the amount which towns may pay for tuition of their pupils in the schools of other towns is limited by statute to \$60.00 per year without an express vote authorizing more, we felt that it was not wise or just to put this schedule into effect without giving a sufficient opportunity at the coming annual March election in the various towns who send pupils to our schools, to take action upon the matter, and we trust that in every instance these towns may take the necessary action to continue their advanced pupils in our schools.

The percentage of non-resident pupils attending our high school is very much below the average, either for the whole state or for the other cities and larger towns. Information obtained from the State Board of Education shows that the percentage of non-resident pupils attending high schools in Vermont covering the whole state, is 23.6%; covering the cities and large towns, 28.3%, while the percentage of non-resident pupils attending our high school is only 17.8%.

II—SCHOOL PLANT

Before going into a general discussion of our school plant we desire to report concerning the alterations at the Longfellow building during the past year. In the last annual report of this Board attention was called to the condition of the Longfellow school building in respect to its lack of repair, the necessity for new heating apparatus, such construction work as would insure the absolute safety of the pupils attending that school, and the need of an entire renovation and redecoration and general cleaning up of the building. At that time also we suggested the desirability and practicability of making certain alterations in the interior of the building, to utilize a large quantity of waste space by adding two new rooms, which would give us a ten room building, with the

seating capacity of the rooms so arranged as to adequately care for the proper instruction of the pupils there in attendance. We also recommended that there be established in such building an intermediate school, whereby the pupils of certain grades would be accommodated through the transitory period, between the younger classes and the high school. Our appeal for a bond issue to permit carrying out this program was very generously granted and during the summer months the work of making the alterations and installing new heating apparatus, with the necessary changes and additions in the ventilating system was done. The floors throughout the building were put in absolutely safe condition. The building was thoroughly renovated and redecorated and in order that the building might be put in the best possible condition, as well as present a pleasing appearance, we determined to and did have the exterior of the building painted, new steps and approach laid, the curbing around the school grounds reset and grading done where necessary, and we are pleased to state that the Longfellow school building is now in the finest condition, both in appearance, adaptability and state of repair of any school building in the city.

The bond issue authorized for these improvements amounted to \$32,000.00. Following is a statement of the construction account covering these repairs, improvements and alterations.

General contract, including extras, plumbing, heating and architect	\$32,105 73
Walk and steps	367 64
Outside painting	650 00
	<hr/>
	\$33,123 37
Bond Issue	32,000 00
	<hr/>
Paid out of the general school moneys set aside for repairs	\$1,123 37

The outside work on the walk and steps was performed under the direction of Mr. Feeley, the Commissioner of Public Works, and was done by his department at the actual cost of the labor and materials, and we take this occasion to express to Mr. Feeley our appreciation of his kindness and courtesy in so ably and willingly assisting us with this work.

As a result of this work, the seating capacity of the building was increased from 336, being eight rooms of 42 seats each, to 350, made up of ten rooms of 35 seats each. The actual number accommodated in the building however in the month of October, 1922, after the repairs were completed, was fifty-one larger than in the month of October, 1921. By this change we were able to reduce the number of pupils per room, to re-distribute the pupils in the various grades so that in other school buildings we eliminated double grading in six rooms, thereby creating a condition in which the rooms were less crowded, where the teacher instead of undertaking to divide her time between two grades, could give her entire attention to one class, with a consequent greatly increased efficiency. We fear that some of our citizens have either wilfully overlooked, or are wholly ignorant of the fact that at least one-half of the money expended at this building from this bond issue would have had to be spent at that time, in that building, if not a single seat had been moved, a single partition disturbed, a single change made in the allocation of the pupils or the system under which they were previously operating, for absolutely necessary and imperative repairs to make the building safe and suitable for habitation.

We now have a building in perfect condition of repair, so arranged and so centrally located that when our high school problem is met by the erection of a suitable building for that purpose, we have a building ready for occupancy adaptable to relieve the congestion and accommodate the expansion of our graded schools for many years yet to come.

It is the deliberate and considered judgment of the Board of School Commissioners that the investment made in

the Longfellow building was the wisest, and most effective move for the betterment of our school system that has been made in many years in our city.

HIGH SCHOOL

The inadequacy of our present high school has reached a stage where it has become acute. We can no longer indefinitely postpone the consideration of some program to relieve our present situation. We cannot much longer go on with the system now in operation and expect that our pupils will receive anything like the benefit and advantage which they should receive from a high school course. Our enrollment last September was so great that we had to adopt a double session plan of operating the school, whereby a part of the students attend during the forenoon only, while the balance attend only in the afternoon. This plan is neither of advantage to pupil or teacher. We are not doing justice to the youth of our city. We cannot under these conditions send them out at the end of their four year course and expect them to be on a par with the graduates of other high schools who provide adequate quarters and full instruction and supervision. Yet, with an enrollment of 515 pupils and accommodations for 390, no other course was open to the Board.

To meet this unfortunate condition it was the intention of the Board to submit at the annual meeting a matured plan looking to the construction of a new high school building and asking for a bond issue with which to finance such construction. A special committee was appointed by the Board to investigate and report upon a proper plan to be recommended. The subject matter, however, is of such far reaching consequence, the conditions entering into the proposition are so varied and the details to be worked out are so numerous, that it became evident to the Board that a satisfactory plan could not be worked out and the details thereof made known in sufficient time before the March election, that every citizen

would have an opportunity to fairly understand the various phases of the project. Therefore, we decided not to submit the question at this time, but to defer action until every person interested might have full opportunity to consider such plan as the board, after a more thorough and exhaustive study and consideration thereof, may feel proper to recommend.

KINGSLEY SCHOOL

Following the practice of the Board for the past two or three years, of putting one building each year in the best possible condition, renovating and redecorating, and keeping our buildings in repair, it is the purpose of the Board to expend a sufficient sum out of its moneys set aside for repairs, to put the Kingsley building on Pine street in the best condition and state of repair that is possible. We are more than ever convinced that this definite method of thoroughly repairing one building each year will eventually result in our ability to keep all of the buildings in excellent repair, with a considerable saving, and at the same time make our buildings much more presentable and satisfactory, than to distribute our entire repair budget among all of the buildings each year.

GEORGE H. BAKER

The Board of School Commissioners, in common with the city at large, has suffered a distinct loss in the recent untimely death of George H. Baker, a member of this Board from 1898 to 1914, inclusive, during one year of which he held the office of President, and from 1919 to the date of his death, on January 20th, 1923. Mr. Baker was recognized as one of the most valuable members of the Board. His long experience and close association with and thorough knowledge of the problems of the schools for substantially a quarter of a century, his deep and untiring interest in the welfare of the schools and of the pupils in attendance thereat, his rugged

honesty, his natural ability and his sound common sense in practical affairs, all combined to make Mr. Baker the ideal representative of the public in the administration of its school affairs. His place will be most difficult to fill and his sound practical advice will be greatly missed by every member of the Board.

Respectfully submitted,

BOARD OF SCHOOL COMMISSIONERS,

By WALTER S. FENTON,
President.

Report of the Superintendent of Schools

*To the Board of School Commissioners, the Mayor, City Council
and Citizens of the City of Rutland:*

I have the honor of submitting to you the twenty-fifth Annual Report of the Rutland City Schools and the second under the present administration.

TEACHING FORCE.

The success or failure of a school system depends in the final analysis upon the quality of its teaching force. We have a large number of progressive teachers who daily prove their efficiency by the excellence of their work.

During the past eighteen months, fourteen new teachers have been recommended by the Teachers' Committee to the Board of School Commissioners and elected to a position.

Mary L. Barry	French	High School
Elizabeth Bowen	English	High School
Mildred Cardelle	Second grade	Lincoln School
Anna C. Carpenter	Fifth grade	Lincoln School
Mary S. DuBois	English	High School
Mable N. Gage	Mathematics	High School
Marion Hausman	Drawing	Supervisor
Elwood F. Ireland	Science	High School
Irene E. Longe	First Grade	Dana School
Mary A. Pierce	First Grade	Lincoln School
William A. Sargent	Principal	Intermediate School
Alice I. Stevens	Latin	Intermediate and High School
Maurice E. Walbridge	History	High School
Jennie C. Walsh	Third grade	Lincoln School

The determination of the Board of School Commissioners to engage only properly trained teachers will improve the personnel of our faculties. Minimum qualifications for teachers in elementary schools are:

- Four years of high school
- Two years of professional training
- Two years of successful experience

Minimum qualifications for teachers in the High School are:

- Four years of high school
- Four years of college
- Two years of successful experience

As an indication that our teachers are professionally minded, I desire to call your attention to the fact that twelve teachers attended summer school last summer distributed as follows:

Harvard University	4
Columbia University	2
New York State College for teachers	2
University of Vermont	3
Hyannis, Mass.	1

Probably every teacher should be required to attend summer school as often as once in three years. The average cost for attendance at Summer School this year was over one hundred fifty dollars. This amount tends to keep many teachers from seeking to improve themselves professionally. The community should provide a financial reward for each term of summer school work.

HOLDING POWER OF OUR SCHOOLS

The number of pupils who completed the elementary school course in June, 1922, was 141.

Number entering Rutland High School	121
Number moved from city	6
Number working	4
Number entering business college	3
Number entering private schools in the city	5
Number whereabouts unknown	2
Total	141

Percentage of pupils entering high school on completion of elementary school course	85.8
Percentage of pupils held in first year of high school	75.7
Percentage of pupils held in second year of high school	78.4
Percentage of pupils held in third year of high school	82.5

The elementary schools keep alive in the children their natural love for school and instill in them the desire for more education. The high school holds a much larger percentage of its pupils than the average city school of this grade. If our school plant, were adequate we could probably hold more pupils for a longer time and thus prepare a larger number of folks for a fuller, richer and a more useful life.

THE HIGH SCHOOL ENROLLMENT FOR THE SCHOOL YEAR 1921-22 IS SHOWN BELOW:

Class	Enrolled 1921-22	Left during school year	Left during vacation	Graduated	In school Sept. 1922
A	64	3	10	60	1
B	120	11	12		99
C	139	18	20		109
D	165	20	3		125
P. G.	10	7			
Total	498	59	45	60	334

REASONS FOR LEAVING

Class	Failure	Lack of interest	Health	Economic	Death	Left Town	Conduct Truancy	To enter private schools	Other Causes	Total
A		1			1			1		3
B	8	6	1	1		2	1		2	21
C	3	6	3	2	1	10	3	1	1	30
D	14	3	3	3		3	7	3	4	40
	25	16	7	6	2	15	11	5	7	94

The sixty Seniors and ten post graduates would be expected to leave.

CITY OF RUTLAND

Percentage of pupils promoted 88.8

191

ACHIEVEMENT TESTS.

For a number of years there has been widespread dissatisfaction among teachers regarding the reliability of the traditional means of determining promotions and general school achievement. It has been known for a long time that a child's chronological age and his mental age may be several years apart. Investigation has shown a wide variation in the credit assigned to an examination paper written by a pupil. For instance a geometry paper written by a high school pupil was rated by one hundred sixteen teachers of geometry who assigned values varying from twenty-eight percent to ninety-two percent with a goodly number of teachers in agreement at each extreme.

In view of these facts and a multitude of others, educators set about finding some more reliable means for the classification of pupils. Standard tests have been devised to determine by scientific means the exact status of a pupil or class. The standards set are derived in each case from the results obtained by the examination of several thousand pupils in city and rural schools.

The Courtis Standard Test in the four fundamental operations of arithmetic was given in the Rutland Public Schools last winter. The results of this test indicated a relatively low rating in both speed and accuracy.

It is possible to use these tests for diagnostic purposes as well as a measure of achievement. The teacher is able to discover the weakness of the class or pupil and adopt a corrective procedure. It is the intention of the superintendent and teachers to continue the use of Standard Tests this year in Silent Reading, Arithmetic, Handwriting and Spelling.

AGE GRADE TABLE—Jan. 1, 1923.

The age grade table given below indicates that there is no serious over-age problem in grades one to four. In grades five and six there are forty-eight pupils who have reached such an age in their physical development that they ought not to be distributed in classes with much younger pupils. The three hundred pupils of normal age or under are placed under a handicap because of the presence of the forty-eight over-age pupils. Lack of adequate room in our schools prevents the proper segregation of these children.

Age	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22
Grade I.....	182	33	7	3			1										226

Totals for High School							4	41	107	127	123	69	30	11	4		1517

INTERMEDIATE SCHOOL

There is every indication that the new Intermediate School is more than meeting the expectations of those who were responsible for its organization.

Enrollment January, 1923.

Eighth grade pupils enrolled	239
Seventh grade pupils enrolled	113
Total	352

Enrollment in the same building January, 1922, 304.

It would be difficult to overestimate the advantages accruing to the pupils of all our schools because of this Intermediate School organization. The six elementary schools and the high school will, in the long run, profit quite as much by this arrangement as the particular groups of pupils immediately involved.

It is evident, however, that we have only gone part way in meeting the needs of our boys and girls in this most critical of the ages of childhood.

We should have a building large enough to provide a separate organization for:

1. The pupils now in the Longfellow building	352
2. The two seventh grade groups now housed at Dana and Lincoln on account of lack of room at the Intermediate School	78
3. The pupils of the first year high school	159
Total	589

There are a multitude of reasons why these pupils should be in one and the same organization. If we are to meet fully the needs of these five hundred eighty-nine pupils, we should provide:

1. A suitable assembly hall.
2. Gymnasium facilities for proper recreation.
3. Home-making and manual training rooms suitably equipped and easily accessible.
4. A library, because real education depends to a large extent upon its proper use.

SCHOOL SAVINGS

For a long time school people have been teaching thrift in an abstract manner and have been looking for means to make their teaching practical. Last fall the Rutland Savings Bank, at considerable expense to themselves, put into our schools machines which reduce the bookkeeping for the teacher in connection with school savings to a minimum. It is the belief of those in charge of the public schools that it is as important to teach thrift as it is to teach any subject on our program. We hope that parents and other relatives of school children will make it possible for the young folks to continue to save through the School Savings Bank system to the end that thrift may become a fixed habit with all of them.

We all feel some pardonable pride in the number of children that are saving and in the amount of money placed to their credit.

School	Number of pupils saving by means of the machines furnished by the Rutland Savings Bank.	Total amt. saved by use of these machines.	Number of pupils saving by use of some other means.	Total number of pupils saving by some method.	Percent of pupils saving by some method.

GRADUATES OF RUTLAND HIGH SCHOOL NOW IN COLLEGE

It is a matter of great satisfaction to note the number of graduates of Rutland High School who desire to continue their education. The number and type of institution our graduates are able to enter and carry to successful completion collegiate work, reflects great credit upon the excellence of their preparation.

 Elizabeth Agnes Wilde
 Francis Sybil Wiley
 Everett Williams
 Morris Bernard Wolk
 Amos Woods
 Horace Stafford Yarrington

In conclusion I would like to state certain convictions and beliefs regarding our school system.

1. Our teachers are in the main doing excellent work with the facilities provided.
2. The Board of School Commissioners has served the public faithfully securing a dollar's worth of service

or material for every dollar expended. Their only concern has been the welfare of the children of this city.

3. The citizens of this city are willing to provide the necessary funds to make our school system second to none anywhere.
4. We never can have good schools in this or any city unless and until the citizens take an active part in school affairs and inform themselves regarding the needs of their schools.
5. If every citizen of Rutland were fully aware of the needs of the children he would insist that a new building be provided at once large enough to accommodate:

a. The senior high school pupils	333
b. The junior high school pupils	
Present Intermediate school pupils	352
Seventh grade pupils in Dana & Lincoln	79
First year high school pupils	159
Total	923
6. The school year just passed has been one of steady progress marked by commendable achievement.

Respectfully submitted,

W. W. FAIRCHILD,

Superintendent of Schools.

Rutland, Vermont
 February 5, 1923.

Auditors' Report

To the Honorable City Council :

We have examined the books and accounts of the City Treasurer, City Clerk, Overseer of Poor, Superintendent of Schools, and Sinking Fund Commissioners, for the year 1922, and find that these officials have duly accounted for all moneys received by them and have proper vouchers for all moneys expended.

We find the records of disbursements as shown by the City Clerk and Superintendent of Schools agree with the entries on the City Treasurer's books.

We have checked the cash, and verified the notes, bonds, deposit books and securities in the hands of the City Treasurer and Sinking Fund Commissioners and found them to be in agreement with the books.

The various books and records in all departments were found in good order and vouchers for all disbursements were produced.

The Treasurer's book shows a balance of uncollected taxes as follows: in the hands of Henry R. Adams for the years 1904-1918 inc., \$706.25; in the hands of John E. Barrett, total amount \$10,326.84, divided as follows: 1919, \$1,074.52; 1920, \$2,360.50; 1921, \$3,211.78; 1922, \$3,680.04. Mr. Barrett has not reported the collection of any of the 1922 taxes, and we call your attention to the fact that he has not turned over any money to the Treasurer since January, 1922, when he made a payment of \$337.70.

ROBERT D. SMITH,
W. T. SIMONDS,
City Auditors.

January, 1923.
